

Tracker Certificate “Ethena sUSDe Market Neutral”

We make ideas investable.

Factsheet as of April 30, 2026

Investment philosophy

The challenge: traditional income strategies under pressure

In today's environment of volatile interest rates and macro-economic uncertainty, traditional income approaches can struggle to deliver reliable, risk-adjusted returns without exposing capital to market swings.

The solution: yield from a crypto-native stablecoin

The strategy addresses this challenge by leveraging Ethena USDe, a synthetic U.S.-dollar stablecoin designed to maintain a 1:1 peg. By staking USDe into sUSDe, the strategy aims to generate yield without taking net directional market exposure.

The mechanism: resilient, market-neutral construction

Built on a largely collateralised and hedged framework, the strategy seeks performance that is uncorrelated with broad asset-price trends. The Ethena protocol dynamically adjusts collateral and hedges in an attempt to maintain the peg and mitigate volatility; stability is not guaranteed. The strategy is therefore positioned as a market-neutral income approach.

Investment strategy

Objective: Generate digital income through market neutral stablecoin exposure

The strategy allocates exclusively to staked Ethena (sUSDe), capturing yield from funding rates in a crypto-derivatives framework. Designed to remain market-neutral, the protocol continuously manages exposure through automated collateral balancing. If the funding rates fall below U.S. interest levels, the capital is reallocated to tokenized Treasury Bills to preserve return potential while avoiding market risk.

Product Advantages

Investor Protection

- Our ETPs and nETPs are secured tracker certificates.
- Each product is fully collateralized, mitigating the issuer risk.
- The collateral is held in custody with a Swiss-based custodian appointed in accordance with applicable SIX requirements and pledged in favour of the investors, with an independent security agent acting on their behalf.

Regulatory Framework

- Each product is issued under a Base Prospectus, approved by, and registered with SIX Exchange Regulation Ltd, the reviewing body within the meaning of the Swiss Financial Services Act.
- Helveteq AG undergoes independent audits and applies IFRS.

Transparency

- Helveteq AG issues the products from its balance sheet and is the ultimate beneficial owner of the collateral.
- The setup is fully Swiss and applies to both the issuer and the instruments.
- Helveteq AG is, for the purposes of the LFAIE, a Swiss company with no material influence from any foreign person.

About the Strategy Manager: Tritemius

Tritemius DAF, SL, Madrid, Spain (Tritemius), is a Spain-based blockchain and Web3 specialist. Through its own venture builder, Tritemius co-founds and actively develops promising Web3 startups. Additionally, the firm manages the EU-regulated venture capital fund “Tritemius Fund FCRE I” and advises institutional crypto hedge funds. Tritemius combines investment, research, and innovation capabilities under one roof, offering end-to-end consulting and strategic services across the digital asset and blockchain ecosystem.
